Another fantastic installment of the Fast & Furious franchise. The farewell scenes to Paul Walker are done beautifully, and the stellar soundtrack from ... yes, you probably recognize it. But, overall, the movie is not as good as the previous three installments and has nothing in common with the previous 1997 film, The Fast and Furious. This movie is nothing more than another story of a group of bad guys led by Dwayne Johnson trying to take down Paul Walker's hero,

who, as always, acts brave and tries to save everyone ... That's about it. The movie doesn't make much sense, lots of scenes that don't make sense, and lots of technical problems.
