
Microsoft Visual Foxpro 6.0 Free BETTER Download Full Version

Does anyone know where I can get a link to download Visual FoxPro? MS support told me that it is no longer available - is that true... I think I'm missing something obvious, but I can't find it online. A friend of mine provided me with a link to download Visual FoxPro (version 9.1). He told me it was free software, but I can't find it anywhere If anyone has a link, please let me know. I would appreciate it. P.S. This was not the only software I wanted to get, so I want to try others. Thanks for your help.
