You can also find the following file which contain the key: C:\Program Files (x86)\Autodesk\Inventor\v2012\bin\InstallShield\licensekey.xml You can also find the key in the file (lines 113 - 115) Italian 329 A: I got the same message while I was trying to activate Windows 10 on a bootable USB Flash Drive. The message: Cannot activate a product that has already been activated. (Code 580069) I've found out, if you try to activate it on a hidden account, you will get the message. If you try to activate it on an account with a password, you will get the message. I don't know if this is the only reason, but it could be the reason. Best solution is to go to the control panel, choose "update and security", and choose "windows update". Then you will get all the drivers updates. After you are done with the updates, reboot and activate again. 1. Field of the Invention The present invention relates to a system, method and computer program product for providing an image file, such as a JPG image, for a physical product. 2. Background Art Traditionally, a physical product is imaged or photographed by placing the physical product in front of a camera. In many instances, the image is captured using a close-up lens or, more commonly, an overhead or macro lens. These lenses have magnification of about 2:1 or higher. Once the image is captured, it can be stored, such as in a computer or a digital camera
