System Requirements For Adobe Shockwave Player:

First thing's first: I'm fully aware of how painful it can be to run an OpenGL 3 game on Windows. I have a GTX 680, with the latest drivers, that will run some software from my old PowerVR GX 430 at 30 fps. That being said, the rendering API in development has been around for about 4 years now, and no one really cares anymore. Windows runs OpenGL just fine, and by and large, OpenGL 3 isn't required for anything, nor is it recommended. I'd like to keep things that way. So we're talking about the OS here
