✓ What EQX Editor Product Key can do: The program can perform the following functions: ✓ Set EQX Editor Features: ● Library manager: For the user, that is a blank slate for all of the equipment with the same serial number. To identify what equipment is in the library, you enter the following serial number: ● Import: · Open the equipment file by opening the.XBZ file. · Select the appropriate database engine, for example SQLite. · Select a database file. · Drop the desired database, and begin updating the equipment. ✓ View equipment: Once the selected database is open, the equipment can be displayed by serial numbers and all the fields are already pre-filled with data. The equipment can be viewed simply by displaying the Equipment Exchange file. ● Update: When you start to work on the equipment, you can add or remove certain fields and even modify the values in the database directly. The equipment that was being used in the previous version of the equipment is removed from the database, and the updated equipment is then displayed. ✓ Export: The exported data can be exported to a.ZIP file, and can be viewed in some other software. You can use the exported file to replace the equipment of the same serial number. EQX Editor Specifications: ● Interface: The main window of the program is split into two sections. In the left side of the window, the equipment is displayed. In the right side of the window, the user can edit information about the equipment by selecting a field from the left side of the window. The user is allowed to edit data on the equipment, and the data is saved to the database by the corresponding field being saved. ● User interface: The user can view the data on the equipment from the left side of the window. The user can confirm the data by clicking the leftmost field of the equipment. The user can see the data on the equipment using the right side of the window. The data can be changed by the user clicking on the rightmost field of the equipment. For the data that can't be changed, the user can only confirm the data by clicking the leftmost field of the equipment. For the data that can be changed, the user can change the value in that field from left to right. As the user changes the data, the change is saved into the database.

Version 1.0.1.0 is the same as Version 1.0.0.0, except that there is now a section "What's New" in the Help menu, the section on MTX in the Main window has been changed to point to the Troubleshooting section of the Help menu, the User menu has been expanded to include the option to run MTX, and the User menu has been expanded to include the menu entries: Exit, File | Exit EQX Editor, File | Exit MTX, and Run MTX. Troubleshooting information on this software is also available in the Help menu. Troubleshooting is still listed in the Main window Help menu, but now the Troubleshooting is actually a single section listing the Frequently Asked Questions, with the Option to Run Troubleshooting under each FAQ. If you've installed the Update that is discussed in the FAQ section for version 1.0.1.0, you should have the option to run Troubleshooting under the option to Run EQX Editor. Version 1.0.1.0 is a minor release of the software. As such, there is not much new in the release. The change is: \* The Options to Exit EQX Editor, Exit EQX Editor MTX, Run EQX Editor, and Run MTX have been added to the Main window menu. \* A section has been added to the Help menu containing a Frequently Asked Question. \* Additional information on the Software and how to update has been added to the user's manual. Version 1.0.0.0 of Multi-Transaction Support (MTX) is a point release of the software. As such, there is not much new in the release, the only change is: \* A section has been added to the Help menu. User's Manual Version 1.0.1.0 of Multi-Transaction Support (MTX) includes a section on installing EQX Editor. \* Please install the version of the Equipment Exchange (EQX) software that corresponds to the version of the MS Excel plug-in that you purchased. Here is the step by step instructions on how to install MTX

What's New in the?

EQX Editor is an equipment exchange editor. It functions like a database to be edited and exchanged easily and the equipment information of all MOAKE-SCs are stored to the database. In order to show the latest version on the main page, the version number must be set to the latest version. With that, the latest version of the EQX Editor will appear on the main page. The main page of the EQX Editor The interface on the main page of the EQX Editor is designed to be visually pleasing. All important functions can be found within various tabs. From the current task to the main page and to the equipment exchange information, all functions are located within just one simple interface. EQX Editor Interface On the website, the main page is divided into four different functional sections: 1. Main page The main page, which is the first tab in the interface, has many useful functions. There are links to the home page, to the main page of the EQX Editor, to the help menu, and to a log file. The main page of the EQX Editor 2.
