The leading cryptocurrency went down by around 18% from a record high around \$185 and has remained in a downtrend since. However, Ethereum is slowly rising and it recently broke the low of approximately \$135. The negative news regarding Ethereum has slowly started to get over and the price of ETH is slowly recovering to the \$200 level. However, when the price of Ethereum rises above the \$200 price level, it will be a bearish sign to end this uptrend. As long as the price remains below the \$200 level, the bulls will have the upper hand. The current trading volume is still quite low. Ethereum is currently trading close to \$1 billion with a daily trading volume of \$300 million. If Ethereum has an unexpected bullish movement at the \$200 price level, it might be the beginning of the end of this uptrend. The technical chart in the last four days, we have been focusing on the long-term downward sloping triangle price pattern which is a bearish continuation pattern. However, we are not sure if there is enough time left for this trading pattern to play out as the price is still following the triangle price pattern. From the chart above, we can see that if Ethereum can break below the triangle pattern, the risk of a bearish move increases to nearly 100%. Support level: \$185 If the bulls break below the triangle pattern, the technical levels to look out for are the \$115 and \$80 price levels. Resistance level: \$200 If the bulls fail to break below the long-term downward sloping triangle and the price of Ethereum rises above the resistance bff6bb2d33

Ronald Martinez/Getty Images For the third straight season, Dan Fouts is recognized as the best quarterback in the NFL. He finished the last season with 4,228 yards of total offense and 30 touchdowns, which made him the first quarterback since former Steelers quarterback Ben Roethlisberger in 2011 (4,835) to crack the 3,000-yard mark for a season. Q: Wordpress - add option to a function I'm new to wordpress and I have a question regarding a function. I have an option 'value' with a set of items, I want to write another function with a list of options, but with the option 'value' as the filter key word or a name of the first option or the second or the third etc. Thanks a lot A: get\_option is a function that returns a WP\_Option object. You can get the value with: \$wp\_options = get\_option('wp\_options'); if (! \$wp\_options ) \$wp\_options = new WP\_Options; \$value = \$wp\_options->get\_value('\_value\_id\_or\_key\_here'); You can use the function filter\_input like this: \$filtered = filter\_input(INPUT\_GET, '\_value\_id\_or\_key\_here', FILTER\_SANITIZE\_STRING); \$filtered will have the value that you want to compare it to. You can use the function array\_intersect\_key: // \$a is the array of values from the first function \$filtered = array\_intersect\_key(\$a, \$b); Q: Why is my first array created empty? Here is my code: import java.io.\*; public class testArray { public static void main(String[] args) throws FileNotFoundException { int i, j, count = 0; FileReader fr = new FileReader("/Users/user/Desktop/test.txt"); BufferedReader br = new BufferedReader(fr); String temp; while ((temp = br.readLine()) != null) { if (temp.startsWith("M")) { int a[] = new int[temp.length()];
