FIFA is the world's most popular football video game franchise. FIFA Soccer is one of the world's best-selling football video games and was the top-selling game of 2001. The series continues to dominate

sales charts and has sold over 100 million copies worldwide. FIFA 07, released on 29 September 2006, was the biggest launch of a video game ever by selling more than nine million copies worldwide on day one. The Game FIFA 22 is built from the ground up on the Football Plus engine and features every player in the game with a unique and complete likeness. Playing through one of 14 leagues across the world, players will become immersed in authentic football culture and discover the detailed physics, realistic ball control and new Artificial Intelligence systems which are revolutionising football gaming. With a brand new Career Mode featuring a manager's journey through one of 14 leagues around the globe, plus the introduction of Soccer Schools and Real Schools with FIFA U17, FIFA U19, FIFA Women's and FIFA Futsal, players will be able to build their own team with the potential to win the World Cup and gain access to new training facilities. FIFA 22 introduces new features like Pass and Move, giving players complete control of free kicks and corners. New formations let players get up and down the pitch with greater fluidity. Mix things up at any time by chucking the ball long to a striker or smash the ball short over a defender with a chest pass. Additionally, FIFA's most comprehensive overhaul of the shooting mechanic since FIFA 09 will improve players' shots and goalkeeping by letting them anticipate shots through ball placement and spin. New Pass and Move gives players complete control over free kicks and corners. New Attacks give players more control over their shots, with the power and placement of passes adjusting to the angle, speed, and timing of shots. New Skills Mechanics improve movement around and away from the ball, allowing players to gain yards from defenders. New Player Behaviour gives players the ability to take the game back when under pressure, adding interaction with their teammates in the defending third of the pitch. Improved Player Trajectory takes the hard, unpredictable bounces out of the game. New defensive player positioning is designed to be more intelligent and reactive, challenging the player to accurately guess where the ball will fall before it arrives. The finest ball physics yet
