FIFA is one of the biggest entertainment brands in the world. The FIFA franchise has sold over 275 million copies worldwide since the debut of FIFA 06, with more than 120 million players having logged on to experience the largest football game on the market. The franchise is developed by Electronic Arts Inc. (NASDAQ: EA) and available on Windows PC, Xbox One, PlayStation 4, iOS and Android platforms. Players take control of a team from any of 23 different national teams competing in more than 350 official competitions as they control the players on-field and guide them towards victory. FIFA 22's Most Wanted Update FIFA 22 takes fans deeper than ever before into the tactical challenge of managing a football club, with fundamental gameplay advancements throughout all modes. Fans can also get their hands on new content such as a new themed Ultimate Team card - the No.1 player worldwide. Key Features Tactical Challenges FIFA 22 delivers an all-new tactical challenge engine and introduces a dynamic ball control system that challenges players to adapt their play to the characteristics of their opponent - and of the pitch. Players now control the pitch rather than an individual player. Every interaction a player makes is decided by the team and is reflected in the on-screen tactics and ball control. New Dynamic Ball Control Players now move and perform individual actions on the pitch, including sprinting, dribbling, heading, and scoring. Players can now control the ball with an increased level of precision. As players make decisions, their movements impact the game in real time, triggering new or changing gameplay scenarios. The ball controls directly relate to the position of the player in the team and off-the-ball actions, allowing the game to change accordingly. New Dynamic Tactical Challenges The all-new dynamic tactical challenge engine presents unique challenges for players. The effects of the player's actions are now built into each challenge, meaning that players must adapt and respond in a matter of seconds. Players can see the on-screen tactics change immediately, presenting a new tactical challenge every time they press a button. Ultimate Team FIFA Ultimate Team has been massively expanded in FIFA 22 with the introduction of Free Agents and reworked main card packs. This will allow fans to collect and build the ultimate squad from their favourite players around the world. The new season of innovation continues with new ways to earn and collect player cards.
