Photograph A photograph is a captured image produced from a recording device. Most photographs are digital. They are stills created with a camera that captures light waves through a lens. Modern cameras can create a still image from video by using a process called _interpolation_. This is done in a number of different ways depending on what the camera is. Interpolation is the process of filling in blanks in a digital photo to create a seamless image. Digital photos can be enhanced with different methods to remove unwanted objects and make them more appealing, depending on the scene and purpose. The most commonly used are masks, lasso, and brush tools. * _Photoshop Elements_ (www.adobe.com/products/photoshop_element.html) * _Adobe Photoshop_ (www.adobe.com/photoshop) * _Adobe Photoshop Lightroom_ (www.adobe.com/products/lightroom.html) * _Adobe Camera Raw_ (www.adobe.com/products/photoshop/camera-raw.html)

The Face Mask makes it easy to select a region of an image that you want to keep. The Magic Wand Tool can be used to select an area in an image or an object that you want to copy to another area. The Pen Tool lets you draw lines, rectangles, circles or ovals. You can use the Eraser or the Magic Wand to select pixels you want to remove. The Pencil tool lets you draw strokes and lines with more control than the Pen Tool. The Spot Healing Brush makes it easy to repair small areas in images. The Spot Healing Brush uses a click-and-drag selection to find a color similar to the pixel you want to repair and applies it. The Shadow and Highlight tools allow you to create shadows, highlights and other effects. The Tool Bar allows you to add and modify buttons and other tools that you can use to edit your photos. The most common use for the Pen tool is erasing unwanted elements, but this tool is also very useful for creating shapes, as you can use it for rectangles, ellipses, circles, or any closed figure. The number of settings you can alter makes the Pen tool one of the most powerful tools in Photoshop. To use the Pen tool in Photoshop, you have to first click on one of the icons next to the Layers list on the Tools Bar. You can use the Mouse or the Pen Tool by clicking on the icon. Once you click on a button in the Tools Bar, you can see a preview on the Tool Window. You can then use the Pen Tool by clicking on it. You can see how the Pen tool looks in the Tool Window. If you want to quickly turn an image into a transparent one, you can use the Eraser tool to do it. This is the ideal tool for quickly erasing unwanted areas in your photos. In addition to the Eraser, you can use a selection tool to isolate an area and then erase it with a brush. The most common Brush is the default Brush size 2 (the default brush size is the size of the brush that comes with Photoshop) and its location is set to the default choice, which is Brush Tool. Pio de Magalhães Pío de Magalhães, O.F.M. (), or Pío Magalhães, (1668 – 1742) was a Portuguese missionary priest who was a leader of the Discalced Carmelite Order in Goa, India. Early life Magalhães was born in Ázua, Lisbon, Portugal, to Pedro de Magalhães and Inês de Castro. Career As a young man, Magalhães studied at the University of Coimbra. He earned his doctorate in theology from the University of Oxford. In 1691, Magalhães went to Goa, which was still under Portuguese rule. Soon after his arrival, he was appointed parish priest of the Sao Francisco de Paulo parish in Belem (Belém). During his tenure there, he expanded the church and reform of its interior. He also helped in the construction of Saint Anthony's College (a college of the Diocese of Coimbra) in Belem. In 1696, Magalhães was imprisoned and then banished for wearing two sets of robes: one for the street and the other for church. He left for Portugal in order to appeal to the king and thus avoid banishment. After arriving back in Goa, he became Discalced Carmelite in the Observant Congregation. In 1698 he was elected provincial of the church. Missionary In 1700, Pope Clement XI made him a missionary to Goa, where he took up residence in an old cottage. In 1708, he was elected metropolitan of the Goan archdiocese. He became the master of novices at Discalced Carmel in 1718. The 1717–1718 Goan plague claimed the lives of many Goans, Portuguese and Indian Christian converts, including members of his own order. In 1720, during a Goan famine, Magalhães and his fellow Carmelites carried out a large operation in which over 100 kilograms of rice were distributed to those in need, at a cost of five rupees (approximately 36 pounds). He died in Goa in 1742. Legacy Magalhães was a relatively open-minded missionary, who opposed the Portuguese prejudice against the admittance of Africans to the orders, and
