Field of the Invention The present invention relates to an information processing apparatus, an information processing method, and a computer program. 2. Description of the Related Art There are known techniques for handling with a graphical user interface (GUI) which is displayed on a display apparatus in an information processing apparatus such as a computer. For example, the current version of operating systems (OS) for PCs provides various functions for displaying various icons on a portion of the desktop displayed on a display apparatus such as a monitor. By using such functions, the user can use a computer by manipulating these icons to access the functions associated with the icons. Also, by using such functions, the user can manipulate functions by selecting a displayed icon, thereby performing a particular job. Moreover, there is also provided a technique for providing a dialog box which displays a list of icons that are stored at a particular location of a file system. In this case, the current version of the OS allows the user to select an icon from the displayed icon list to open the particular file or directory with which the icon is associated. As a conventional technique for displaying various icons on the desktop, Japanese Patent Laid-Open No. 2000
