A: I looked at the source code of one of the online tools I use for extracting files and it is not streaming the file as you claim, it is retrieving a fixed amount from the streaming data. Here is what it looks like:

```
def streaming(self): if self.filename == "": return [] local = [] chunk_size = 1024 buffer_size = 1024 * 1024 with open(self.filename, "rb") as f: while True: buf = f.read(chunk_size) if buf: local.append(buf) if len(local) == buffer_size: local = local[0:1024] self.amount_left -= buffer_size else: self.amount_left -= len(local) local = local[0:len(local)] random.shuffle(local) if self.amount_left
```
