LG has confirmed that the issue of repairing the cooler, heat pump and F condensers.This invention relates to an electro-acoustic transducer, and more particularly to an improved acoustic transducer of so-called "voice coil type" used for a speaker or microphone in various electronic equipment such as a radio, a phonograph or the like. Conventional acoustic transducers of this kind, hereinafter referred to merely as "speakers", have been constructed and fabricated by a method of shaping a magnetic pole piece, by etching a flat ring shape from a sheet metal strip or molding it from a magnetic sheet material, and then forming a voice coil into the desired shape by a plastic or metallic molding process. However, prior art speakers of this kind suffer from the problems as described hereunder. First, since the coil is a flat ring in
