What's New In Mozekty?

1 - It's quite easy to use Mozekty RadioStations Player because it's basically only a Media Player with several nice extra features. If you want to play a MP3 file, what you have to do is just clicking on the file and choosing "Play". You can add an internet radio station by simply clicking on the button below the list of radio stations. 2 - You can get a complete list of internet radio stations by searching for them on "Bitsnips". 3 - A nice but easy and not very effective way to edit your station list is to edit the XML file in the XML folder. You can simply add or delete stations by checking the "Delete" boxes

and clicking on "OK". The XML file is automatically saved when you exit Mozekty. 4 - You can get a list of your favourite stations by clicking on the button below the list. You can also get a list of the latest internet radio stations that can be played by clicking on the button below the list. When you click on the above button you will be connected to "Bitsnips" (www.Bitsnips.com) where you can get a complete list of recent stations found on internet. 5 - When you play a station from Mozekty's stations list you will get full control from Mozekty system tray icon. You can get full information about the station playing and you can also choose between SD and HD quality. 6 - Mozekty is extremely small. If you have a computer with an Intel Pentium 3 CPU, you can run it without affecting other running programs. 7 - You can play more than

one station at the same time. To do this you have to click on the list button and check the radio station in the list that you want to play. 8 - When the program is minimized it will use only a small amount of memory and it won't create a new window. The program is very small so it should have a small start-up time. 9 - You can lock the program's window if you want to work uninterrupted. 10 - The program can be automatically closed at regular intervals, so you can always keep on playing without stopping. 11 - You can set custom actions in the Preferences / Options menu. 12 - When you add a radio station by clicking on the button below the list, you can choose the quality (Quality - Standard and Quality - HD) and the volume. 13 - Mozekty will look good with
