The app is wrapped in a neat and clean interface, structured in six distinct categories: "Home", "Scan", "Clear web browser", "Repair", "Startup and uninstall" and "File shredder". The "Home" tab displays the performance level of the system, the risk (low, medium, high) and when the last scan was performed. Select what elements should be scanned. Plus, categories like junk, duplicates or malicious ActiveX files can be marked for the scan. NetEraser Cracked 2022 Latest Version also lets you erase the history folder, cache and cookies and recently typed URLs from Internet Explorer, Opera or other browsers you may have installed. Repair files and handle startup programs. It's possible to follow the same steps for Windows Explorer's temporary files and recent documents, as well as for the system, Recycle Bin, clipboards, logs or dead desktop shortcuts. Once the scan is complete, the records are displayed in a list with their extension name and description, and can be restored. Check the status of the firewall and NetBIOS. In the "System Repair" tab, the tool displays the status of several system functions, such as the firewall, NetBIOS, RPC locator or IPC\$. Plus, you can reduce the booting time by removing unnecessary items from the startup list or by uninstalling the ones you don't need anymore. It would've been useful if the app offered a scheduler to set automatic scans on specific days, along with a registry defragmentation function. Decent system scanner and cleaner. Taking everything into consideration, NetEraser Cracked Version is a reliable utility that comes in handy when you want to scan, delete and repair outdated and unnecessary system files, as well as clean the web browser's cookies, history and downloaded items.
