Shock FLV Player Free Download

SHOCK FLV Player is a small software application designed with a single goal in mind: to help you play FLV files. Simple looks You are welcomed by a clean feature lineup that allows you to carry out most operations with minimal effort. Everything is kept as simple and clear as possible, so there's support for only a few configuration settings. Main features Shock FLV Player gives you the possibility to add FLV files into the working environment using the built-in browse button, so you cannot rely on the drag-and-drop support. The tool comes bundled with several handy parameters for helping you manage the FLV files. You are allowed to play, pause, or stop the current video selection, seek for a position in the video streams, alter the volume, as well as switch to a full-screen mode for a better focus on your work. Since it doesn't require much computer knowledge to set up the dedicated parameters, even less experienced users can learn to master the entire process in no time. During our testing, we have noticed that Shock FLV Player carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered, and provides very good video quality. Bottom line To sum things up, Shock FLV Player offers a simple software solution for helping you play FLV files in a full-screen mode. Thanks to its intuitive interface, it is suitable for rookies and professionals alike. Features: - Clean feature lineup - Configurations are simple and clear for less experienced users - 8 FLV file support - Pause, play, stop, mute, adjust, mute - Full-screen mode - Four quality levels - Smooth player - 5 different audio modes: Normal, Laptop, PC, PS3, and PSP - Audio visualizer that shows the current status of the audio - Batch conversion to MPEG-4 or MP4 format - Optimized for playing on your phone, PSP, PS3, TV, and more Requirements: Intel Pentium 4 GHz or faster CPU Memory 512MB or more for MP3 support, or

Recreate the magic of the yellow background The background is the first thing that attracts your eye when you open an FLV file. Therefore, it's of prime importance to choose the background you like the most. For this purpose, we have prepared 20 different backgrounds. Do you want to recreate the magic of the yellow background? Don't be afraid of trying the yellow background, as it comes with a watermark, which can be turned off in the advanced settings. The background with a watermark The slightly faded blue background is a great start to your video watching. Feel like a local and take a trip through time: by simply clicking your mouse a different movie emerges in the background! Extend the background to the edge of the window By changing the settings, you can actually change the size of the area that is covered with the background. You can turn it off completely, so you will see the typical FLV format window without a background. Change the background color Now it's time to do a color change in the background. It's also possible to choose a color that is completely different from the original. Note: With one click you can switch the original and new color. Change the background when the video is paused It's easy to select the new color for the paused video. Just skip through the video and a new background color will be used. Note: When the
