In the current era of effective anticoagulation, effective thrombolysis has become a therapeutic option for pulmonary thromboembolism (PTE). This study presents an economic analysis of the use of preoperative thrombolysis for patients presenting with acute PTE. Records were compiled for a cohort of patients who received preoperative thrombolysis between January 2005 and July 2011. The primary outcome measure was in-

hospital length of stay. Economic analysis was performed to compute the cost associated with the patients receiving thrombolysis. Eight hundred forty-two patients received an intravenous thrombolytic agent. Two hundred seventy-seven (33%) received a thrombolytic agent preoperatively; and 269 patients (34%) had no thrombolysis. Mortality was significantly higher in patients receiving thrombolysis (9% vs 3%; p = 0.001), but was primarily attributable to patients who presented with hemodynamic instability (31% vs 8%; p I read recently that a new script for the movie "Red Dawn" was being developed. It's been created by another well-known action and sci-fi writer, John Carpenter, who wrote the original "Star Wars" script. The details of the script were not revealed; I'm sure that the script is under development and will be scripted when the movie is finished. The biggest problem that I found with "Red Dawn,"
