At the time of release, AutoCAD Product Key 1.0, running on the Microsoft MS-DOS operating system, was the first widely used CAD program for desktop computers. In 2012, AutoCAD 2.0 and AutoCAD

LT, both running on Windows 7, were among the top 50 most popular desktop software applications, according to a study by the Pew Research Center's Internet & American Life Project. In January 2006, AutoCAD 2006 was released. AutoCAD 2006 was released

in two editions, with and without AutoLISP programming support. All versions of AutoCAD 2006 included the newest version of AutoCAD graphics technology at that time. From March 2009 to March 2013, Autodesk released AutoCAD versions 2009,

2011, 2013, 2016, 2017, 2018 and 2020. In addition to updating the base application, Autodesk has added many new features in these versions of AutoCAD, such as the ability to import models from popular design web sites, and tools for 3D modeling, animation,

graphics, and database. In December 2009, Autodesk launched a new 2D-only version, AutoCAD LT 2009, that ran on Windows and Mac OS X. AutoCAD LT 2009 was the last AutoCAD version that supported MS-DOS. AutoCAD LT 2009 did not include some features

found in other versions of AutoCAD, including AutoCAD's ability to use 3D-enabled printers and plotters, and the ability to use images on standard plotter sheets, rather than requiring a laser or other high-resolution plotter. In January 2011, Autodesk

introduced AutoCAD WS 2011, which was the first version of AutoCAD designed to work with online design services such as Autodesk's Revit, Rhino, and BIM 360 Degrees. In November 2012, Autodesk released AutoCAD WS 2016, which also supported online design

services, as well as AutoCAD's cloud-based Cloud app. AutoCAD WS 2016 was the last version of AutoCAD designed to run on Windows XP and Windows Vista. In March 2013, Autodesk released AutoCAD WS 2020, which continued to support online design

services, and introduced the ability to work with real-time 3D printing. In July 2013, Autodesk announced its intent to merge the commercial desktop and online versions of AutoCAD and Autodesk Design Suite into a new

neuroinfection caused by diverse pathogens. The diagnosis is based on clinical features and neuroimaging, and is rarely confirmed by microbiologic diagnosis. Data from epidemic encephalitis remain scarce in Guadeloupe. We report the clinical and microbiological

features of patients
hospitalized for encephalitis
in Guadeloupe.
Retrospective study of all
patients hospitalized with
encephalitis in the University
Hospital Center of
Guadeloupe from 1 January
to 31 December 2010. Of the
229 patients hospitalized

with encephalitis, 24 (10.5%) were confirmed by microbiology (Herpes simplex virus [HSV] in 12 cases, enterovirus in one, other viruses in 4, bacteria in 2 and other microorganisms in 1). The median age was 10 years (4-22 years), and 11 were under 5 years old.

Male sex was predominant (20/24, 83%). The most frequent symptoms were fever (16/24, 67%), confusion (14/24, 58%), headache (14/24, 58%) and seizures (12/24, 50%). One patient was reported to have neonatal encephalitis. No association was found

between the presence of encephalitis and season. The median interval between the onset of symptoms and the hospitalization was 2 days (1-4). The median duration of hospitalization was 6 days (2-20 days). Outcomes were complete recovery (15/24, 62%), sequelae (6/24, 25%)

and death (3/24, 12.5%). Encephalitis accounted for 17% of all cases of central nervous system infections in our study. Our results confirm that viral causes are predominant in children and HSV is the most common agent. This study emphasizes the need for

microbiological confirmation
of encephalitis, even in
children. Facts about the
