Roblox is an online game creation platform developed by David Baszucki and Erik Cassel in 2004 and released in 2006. It allows users to design virtual worlds and games and play in worlds that other users have designed. The focus of the platform is on building community, and users are encouraged to create games for others to play in a manner similar to massively multiplayer online games. The game was primarily designed for children, but it also attracted an adult user base, including the video game developer Sparkypants. The platform is free to play, but players can pay to unlock certain features or to speed up the game development process. Roblox games are programmed in the Lua programming language. Roblox supports game controllers, such as the Xbox One controller and the Nintendo Wii U gamepad, and the developers have released several plugins for third-party game development platforms such as Unity, Unreal Engine, and GameMaker Studio. Roblox released Robux, the game's virtual currency, in 2015. Roblox Description: Roblox is an online game creation platform developed by David Baszucki and Erik Cassel in 2004 and released in 2006. So, the question is, should you spend real money on free robux in Roblox, and if so, should you spend on a legitimate generator or simply use the one that does not tell you to do so?
