
Datam Copra RF V.2005 SR1

privacy for everyone. copra fails to provide for the civil rights of individuals. although it guarantees everyone the right to privacy, it only protects the right of individuals to seek enforcement of that privacy right before a court. it does not guarantee that anyone has the right to enforce the law in any other way. for example, copra protects the privacy of employees and contractors, but it does not guarantee that any individual has the right to be free from discrimination based on a covered entity's practices. similarly, copra protects the right of an individual to be free from discrimination based on their political affiliation, but does not guarantee that the individual has the right to work for a political party, or to obtain any political jobs. further, in a post-9/11 world, copra does not even guarantee the right of every individual to be protected from discrimination based on race, ethnicity, religion, or national origin. copra only provides that the government cannot discriminate against individuals because of their race, ethnicity, religion, or national origin. but, in an increasingly globalized economy, the government can discriminate against individuals because of their race, ethnicity, religion, or national origin. copra also fails to provide the right of every individual to participate in the political process. copra only provides that government cannot discriminate against individuals because of their political affiliation. but copra does not guarantee that a particular political party can discriminate against individuals because of their political affiliation. it only guarantees that the government cannot discriminate against individuals because of their political affiliation. it does not even guarantee that the government cannot use the name of a political party in an election law, or discriminate against individuals because of the names of other political parties.

privacy shield compliance. copra, in section 107(a), requires covered entities to enter into binding agreements with the eu to protect personal data transferred to the eu. copra, in section 107(b), provides that if an agreement is made, the covered entity must comply with the transparency, security, and enforcement requirements of the agreement. we recommend that copra require the agreement to be in place before the covered entity can process data for the purpose of transmitting it to the eu. this would provide the ftc with the ability to monitor compliance. we suggest a related change in copra. section 110(c) of copra allows a covered entity to comply with the eu-us privacy shield as a separate and additional condition to compliance with copra. we suggest that copra allow a covered entity to comply with the privacy shield only if the covered entity is also in compliance with copra. this would permit the ftc to check compliance with the privacy shield as part of its enforcement of copra. mandatory data minimization. copra requires a covered entity to establish a data minimization program. copra, in section 104, describes data minimization as a process of reviewing and deciding what data is appropriate to keep, and for how long. the ftc needs guidance on the application of data minimization. in this regard, we recommend a change in section 105 of copra. section 105 currently provides that the ftc shall provide a “data minimization manual.” we suggest that the ftc do so, but instead that the ftc do so in conjunction with the agencies that the ftc deems appropriate, such as the federal trade commission, the department of health and human services, the department of defense, and the national security agency. this would result in the ftc writing a “data minimization manual” that would be a template for data minimization across the various departments. 5ec8ef588b
