Even though Grammarly for Google Docs is still in beta mode, it's easy to install and start using. It works in all common browsers, including Chrome, Safari, Firefox, and Edge but the fullest experience with advanced suggestions are only available in Chrome. Trained to successfully predict word choices, the AutoCorrect helps to avoid errors that you make that are potentially grammatically incorrect, but relate to the correct word choice. For example, the might not work for everyone, but when I use the phrase, "Everyone I know knows...", Grammarly detects that "everyone I know knows what a good product is."

The authorization phase looks different for both agency and JAB, however the overarching steps remain the same, starting with a full security assessment and finishing with an authorization process. Once the authorization process is complete, a CSP must engage in continuous monitoring to ensure that the risk accepted at the time of authorization remains acceptable. The JAB Provisional-Authority To Operate (P-ATO) signifies all three JAB Agencies reviewed the security package and deemed the risk acceptable for the federal community. In turn, Agencies review the JAB P-ATO and the associated security package and clear it for their Agencies use. In doing so, the agency issues their own authorization to use the product. Additionally, the JAB will conduct continuous monitoring for systems that have earned a P-ATO. 5ec8ef588b
